

Prowise OPS pc-modules

A Prowise PC module turns your touchscreen into a real computer. Insert the PC module into the OPS slot and use Windows 10 directly on your touchscreen. Without having to connect an external laptop or computer via cables.

Prowise also offers PC modules with Intel vPro technology. Intel vPro offers the possibility to remotely monitor, protect, manage and support all the PC modules. It also allows the use of Intel Unite - Intels secure wireless connection to conference room displays for domain-joined users.
